WHAT'S IN THE PROGRAM:

For grades K-12

- **47** different *Vocabulary DVTs*, each in the form of both a Power Point slide (.pptx) and Interactive Adobe PDF document with embedded textboxes.
- Samples of how K-12 teachers have used each of the DVTs
- Step-by-Step guidelines for implementing an array of specific teacher-assisted and peer-assisted routines designed for use *Before / During / After* a lesson.
- Interactive Vocabulary Lesson Planner

\$39

A free demonstration version of this program may be downloaded from

www.MakesSenseStrategies.com.

The fully-functional version of the program is available for purchase and immediate download at www.MakesSenseStrategies.com. (single-user license). Purchase orders accepted.

For information about multi-user licenses or bulk purchases of the program, please contact us at VisualTools@MakesSenseStrategies.com

DESCRIPTION

The *Vocabulary DVTs* are unique in that they incorporate key thinking strategies targeted by the K-12 Common Core Language Arts Standards (e.g., summarizing key ideas about a term's definition, asking and answering questions, making comparisons, as well as forming and checking inferences or predictions about the meaning of unfamiliar terms. Because the program includes a series of leveled *Vocabulary DVTs* that reflect a simple-to-sophisticated sequence, they are ideal for use when differentiating instruction. Likewise, some of the DVTs are designed for use at the *beginning of a lesson* to review critical previously taught terms and/or pre-teach the meaning of new terms that will be encountered during the lesson. Others are designed for use *during the heart of the lesson*, and some are designed for use at the *end of a lesson* to facilitate reflective reviews of the meaning of new terms and to "anchor" their precise definitions. (see pages 2 & 3 for additional information)

VOCABULARY v2.0

In addition, the program includes a range of Vocabulary DVTs designed for teaching some of the underlying language skills associated with learning new terms and are ideal for use in students' word-banks (e.g., DVTs that focus on word types, word-substitutions, as well as knowledge of adjective and adverb extremes, word tenses).

The program features a series of digital DVTs in the form of interactive PDF files and ready-to-use Power Point files with built-in animation feature as well as samples of how teachers have used each of them. Because they are digital files, teachers or students can use a keyboard to type information directly into the text boxes on the DVT. Likewise, you can email copies of the DVTs to students, so they can use them when completing assignments outside the classroom, and students can submit the completed work electronically. When you develop a DVT for specific instructional units, you can save your completed (or partially completed) DVTs to a folder that contains other related unit information and files.

The Power Point versions are ideal for use with White Boards, Promethium Boards, and LCD projectors when displaying a DVT to a class and developing the information on it during a class activity.

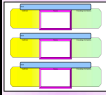

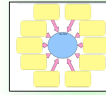

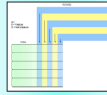

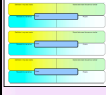

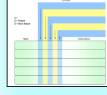

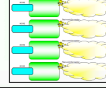

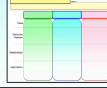

The *interactive* PDF file versions of the DVTs work with Macs, PCs and most importantly tablets such as iPads. These are ideal for "paperless" schools. The blackline versions are more appropriate for printing hard copies to share with your students.

The licensed user (teacher) may make and distribute copies of the Vocabulary DVTs to students for whom s/he is responsible for teaching, but the DVTs may not be shared with non-licensed teachers or students not on the licensed teacher's role. The software may be loaded on the licensed-teacher's classroom computers (with the exception of computer labs) and on the teacher's personal computer.

TOPIC

1790s - American History, Chapter 8

Is about ...

How the US government started supporting the development of manufacturing industry in US

DISTINCTIVE FEATURES

CONTEXT (how author used term)

TERM

burgeoning

Something that is developing quickly

CATEGORY

how something begins

CONTEXT (how author used term)

Congress also acted to promote the **burgeoning** manufacturing section of America's economy that the war had stimulated.

TERM

protectionists

wanted to protect US industry from foreign competition

BIGGER PICTURE

Group of Congressmen

CONTEXT (how author used term)

Protectionists in Congress passed a **tariff** law that limited competition abroad on a wide range of items (including cotton cloth).

TERM

tariff

Fee on imported goods to make them more expensive in order to help local producers sell similar goods at a fair price

BIGGER PICTURE

Kind of tax

CONTEXT (how author used term)

While local producers (farmers, manufacturers) liked tariffs, importers were angry about **tariffs** because it cut into their profits

TERM

enabled

Created ability to do something

BIGGER PICTURE

Action people do

CONTEXT (how author used term)

Steamboats stimulated the agricultural economy of the West and South, as they **enabled** eastern manufacturers to send finished goods to these places much more easily.
