

Coaching Implementation of the Literature DVTs: Case Study

SECTION 1: 9th grade English teacher, Ms. Jones, expresses concern about teaching Common Core Language Arts Standards to students who do not seem to have sufficient prerequisite reading and writing skills for instruction in the grade level standards to be appropriate.

SECTION 2: Using questioning strategies and dialogue, the coach explored aspects of the problem, encouraging Ms. Jones to reveal as much as possible about her perceptions of the problem. As a result of the discussion, the following key ideas were identified.

- * Ms. Jones does not feel that she has been properly prepared to teach some of what she perceives as the more complex reading literature standards.
- * As a group, her students can decode words sufficiently to read most of the 9th grade literature prose, but their ability to form inferences about characters, plots, and themes is minimal, in part, Ms. Jones surmises, because they have very limited background knowledge.
 - Most of her students struggle with summarizing passages.

To narrow the focus, the coach asked the teacher to indicate her priorities, from the perspective of:

- Personal interest (e.g., more investment in teaching students writing or reading literature skills);
- Greatest concern (students meeting reading vs. writing standards);

As a result of this conversation, the teacher elected to target skills associated with reading literature.

SECTION 3: Ms. Jones and the coach examine the 9-10 grade CCS Standards for Reading Literature. Ms. Jones selected two standards (RL 9-10, 10.1 and RL.9-10.3) that she wished to develop expertise teaching.

CCSS.ELA-LITERACY.RL.9-10.1

Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

CCSS.ELA-LITERACY.RL.9-10.3

Analyze how complex characters (e.g., those with multiple or conflicting motivations) develop over the course of a text, interact with other characters, and advance the plot or develop the theme.

The coach and Ms. Jones scheduled a time to video one of her lessons that is intended to address the targeted reading literature standards. A lesson is video taped, and the coach and teacher review the video independently. They then meet to discuss the video. As the video unfolds, the coach posed questions about what happened, what Ms. Jones intentions were when she did specific things during the instruction, how well she felt students responded to them, etc.

Since the CCSS focused on drawing inferences as well as character motivation, the coach noticed from the video that students didn't seem understand what inferences were, nor did they seem to be able to articulate key features of characters which the author explicitly articulated. She also noticed that Ms. Jones seemed to sense this in the middle of the lesson, and then attempted to simultaneously teach both how to form inferences, and how to identify character traits at the same time. Through questioning and discussion, the teacher confirmed these observations.

Strategic Instruction Model™

SECTION 4: Together, the coach and Ms. Jones formulate a student-focused goal:

After reading a short story, students differentiate, with 85% accuracy, explicit information provided by the author about a character's qualities from inferences drawn about them in three different character trait areas.

SECTION 4: The coach and Ms. Jones began to explore instructional strategies for addressing this goal, Ms. Jones indicated they she often used webs and Venn diagrams, but couldn't figure out how to use them when teaching the standard. Thus, the coach identified and described three possible options involving the use of visual tools and their accompanying instructional strategies them from which Ms. Jones might choose:

The Framing Routine Character Analysis DVT Motivation Inferences DVT

To narrow the focus, the coach asked the teacher to indicate her priorities, from the perspective of:

- Best fit for teaching the targeted standards
- Quickest impact (more likely to impact students' reading skills or writing skills);
- Easiest to implement

Ms. Jones chose to implement the *Character Analysis DVT* because it contained key prompts that she thought her students could respond to effectively while simultaneously addressing both how to identify explicit information provided by the author, and how to formulate inferences about them. They thought the Frame did not provide sufficient guidance in the way of prompts. She also thought that once students learned how to use the *Character Analysis DVT*, it would be relatively easy to advance to the more sophisticated *Motivation Inferences DVT*.

SECTION 5: Ms. Jones indicated that the class would be reading *Inherit the Wind*, a play by Robert Edwin Lee. The coach provided Ms. Jones with a copy of the *Character Analysis Rubric* and discussed how the rubric might serve as a form of checklist used when developing the content for the *Character Analysis DVT* when applied to the character, Mathew Harrison Brady.

The coach and Ms. Jones then co-constructed the "Mathew Harrison Brady" content for the *Character Analysis DVT*, using the *Character Analysis Rubric* as a guide and checklist.

Character Features

Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text.

CHARACTER: **Matthew Harrison Brady**

PROTAGONIST

ANTAGONIST

MINOR

STATIC

DYNAMIC

HINTS / Words the author used

INFERENCES / What might be true but the author didn't tell

Appearance

How the character looks

Benign giant of a man
Gray, balding
Paunchy, an indeterminate sixty-five
Wears a pith helmet

He carries himself proudly like an important person to be revered.
He is dressed rather formally, so the townspeople will view him as more important.

Self-perceptions

What does the character think about himself or herself?

He views himself as a righteous man
He believes he is an expert on the Bible
He believes he is a good leader (he has run for President three times)

He is not open-minded about other people's ideas and religious beliefs.
He may think of himself as a great leader, but many do not think so.
Three losses must bother him.

Perceptions of others

How does the character tend to view others?

He views Cates as an unlawful teacher trying to steer young people away from traditional beliefs.
He respects Drummond as a good attorney, but thinks he doesn't have a chance to win this case.
He views Rev. Brown as too vengeful.

He is afraid of young people thinking about ideas that do not support traditional views
He is overly confident because of the conservative attitude of the people.
He fears that Rev. Brown will incite violence.

Actions toward others

How does the character treat others?

He treats Drummond like he is foolish, and he is arrogant towards him.
He gently reminds Rev. Brown & the crowd that it is not right to condemn others. He urges them to be forgiving.

He gloats as if he has already won the case.
He shows that he tries to follow the entire teachings of the Bible whereas Rev. Brown is acting like he has only read the Old Testament.

Transformations

How does the character change in the story?

His arrogance changes into humiliation when Drummond undermines his authority as an expert of the Bible. Insecurities emerge from his lost elections. He collapses and starts reciting an acceptance speech for a Pres. Election.

Drummond tries to make Brady reconsider some of his own ideas, but he lacks the inner strength to adjust.
When he recites an acceptance speech as he is carried away, all the failures of the elections come crashing down on him. This failure takes him "over the edge".

Role in the story

Why was the character important to the story?

Drummond represents Freedom of Thought and is the defense attorney. Brady represents Fundamentalism and is the prosecuting attorney. Their roles are equally important to this story. Their characters are based on real people.

In the historical Scopes Trial, Drummond is portraying the famous Clarence Darrow. Brady's role is based on William Jennings Bryan. I think the authors want the reader to think about the importance of freedom of thought as revealed by Drummond through Brady's testimony.

Character Analysis Rubric

SUMMARY OF IMPORTANT EVENT

2 Inference-free, accurate & precise summary of event 1 Inference-free accurate, some irrelevant information 0 Includes inaccurate information and/or inferences; does not precisely summarize event

TEXT EVIDENCE Words the author used to describe the character's actions or reactions during the event...	INFERENCES What might also be true about the character's actions or reactions, but the author didn't tell	EXPLANATION Why I think my inferences might be true
1 <input type="checkbox"/> Inference-free, specific text evidence (words or phrases from text, noted or cited) that directly address character's actions or reactions to event	0 <input type="checkbox"/> Includes inferences or information not explicitly provided by text	1 <input type="checkbox"/> Logically related to explicit information provided by text
	0 <input type="checkbox"/> Not logically related to text	1 <input type="checkbox"/> Plausible explanation for why the inference might be true; makes sense
		0 <input type="checkbox"/> Not plausible; does not make sense

CONCLUSION

2 Conclusion addresses significance of character relative to role in story and/ or connections to real life; plausible 1 Conclusion summarizes characters features, but does not address the bigger picture 0 Conclusion does not address meaningful information about the character

SECTION 6: Once the *Character Analysis DVT* for Mathew Harrison Brady had been developed for use as a private guide-one-the-side, the discussion next shifted to how to implement the Cue→D0→Review routine featuring *Ideas→Notes→Elaboration* “Do” tactics for providing initial instruction in use of a DVT. Using *DVT Implementation Checklist* for Initial Instruction, the coach described each of the routine’s major components, and then invited Ms. Jones to make modifications in the procedure that she thought would fit better with her teaching style and expertise as well as needs of her students.

Ms. Jones decided that it would be best to only use page 1 of the 2-page DVT for initial instruction since her students were not familiar with DVTs. Other than this modification, she thought the basic components of the *Ideas→Notes→Elaboration* procedure fit her style and students’ needs well.

SECTION 7: Next, the coach provided Ms. Jones with options as to how she would prefer to see the technique modeled.

For example...

In the classroom (*have the coach model use of the DVT in one of the teacher’s classes*).

In the classroom with no students.

Co-teaching

Visiting other teachers’ classrooms as they use the *DVT*.

Viewing a video of another teacher using the technique.

Ms. Jones indicated that she preferred to have the coach model the use of the DVT in her 1st period class, so she did. Then, for the remaining classes on Monday, Ms. Jones used the DVT by herself. She videoed her last class.

SECTION 8: The coach and Ms. Jones viewed the video separately and then met to discuss the video and examine students’ DVTs that resulted from her instruction. Ms. Jones seemed enthusiastic and very encouraged by her experiences.

In the context of assessing progress toward the student outcome goal, the evidence on the DVTs, as expected, just reflected the guided notes prompted by the teacher, thus did not indicate whether students could actually independently differentiate between explicit and inferred character traits when reading. The coach, therefore, began to explore options that might produce data that could be evaluated.

Three possible evaluation options were developed:

OPTION 1: Randomly select representative (high-, typical- and low-achieving) students and orally question them about a character about which they have been reading. Responses would be assessed for evidence that students could, from memory, identify character features on three different trait categories, and when cued, could articulate corresponding inferences (e.g., *things about the character’s actions toward others that might be true, but the author didn’t tell*) and why they thought the inference might be true.

OPTION 2: Design quizzes the whole class would take containing a series of true vs. false statements and unreasonable vs. reasonable inference statements about characters.

OPTION 3: Have students write short essays about characters and then evaluate their content for evidence.

Thinking the DVT could be used as a pre-writing expository essay planner, Ms. Jones was intrigued by the writing option, but believed it better to just interview a representative sample of her students to take the pulse about how well the class was progressing toward the student-outcome goal. As a result of the discussion the following teacher-focused goal was developed:

TEACHER-FOCUSED GOAL: Collect representative student data indicating ability students identify character features on three different trait categories, and when cued, articulate corresponding inferences; use this data a a guide for refining instruction.

Ms. Jones indicated that she could use the *Character Analysis Rubric* when interviewing students as a method for quickly assessing students' responses and noting their scores.

Thus, Ms. Jones wished to continue implementing the modified DVT as before, but this time also collect data indicating whether students were progressing toward the goal.

A date was established for videoing another lesson, etc.

COACHING DVT IMPLEMENTATION: 6

Example Goals: Differentiated Visual Tools

Example Goals focused on Student Outcomes (CONTENT):

SCIENCE

The student will identify key features of appearance, nourishment system, reproductive system, transportation system, and habitat of specific life form with 85% accuracy.

The student will compare/contrast life forms' appearance, nourishment system, reproductive system, transportation system, and habitats with 85% accuracy.

The students will how/why at least two factors affect a given life form system with 85% accuracy.

HISTORY:

Given a notable person (or group) from history, the student will explain two of the person's goals, actions taken to attain the goals, and impact of those actions with 85% accuracy.

Given two notable persons (or groups) in conflict, the students will explain the qualities and goals of each, how their actions resulted in conflict, and the impact of the conflict on history with 85% accuracy.

Given an significant idea from history, the student will identify with 85% accuracy core beliefs / values associated with the idea, ways the idea was transformed into actions, and the impact of the idea at the time it become notable and at the present.

LITERATURE:

After reading a short story, students differentiate, with 85% accuracy, explicit information provided by the author about a character's qualities from inferences drawn about them in three different character trait areas.

Given a character from literature, the student will describe with 85% accuracy the character's personal qualities, motivation, actions, and impact of those actions.

With 85% accuracy, student will describe, in a manner that clearly distinguishes explicit information provided by the author from inferences drawn, the personal qualities of two characters, how they interacted, and how the interactions affected the story.

The student will identify a theme of a literary work, and explain in a plausible manner, how the theme is manifested in characters' qualities and/or actions, scene(s), and/or plot with 85% accuracy.

COACHING DVT IMPLEMENTATION: 6

Example Goals: Differentiated Visual Tools, Cont'd

Example Goals focused on Student Behavior:

The students are on-task during 90% of the time intervals.

At least 5 students raise their hands to participate for each question.

Example Goals focused on Teachers:

I will increase student engagement by posing at least 4 open-ended questions (“Why” & “How” questions) that required student-pairs to formulate elaborated responses).

I will increase student engagement by providing review activities for at least 10 minutes at the end of the lesson during which student pairs use their DVTs to explain ideas noted on them to their partners.

I will use think-aloud tactics when modeling the process of summarizing information to note on the DVT at least twice per lesson.

To enable students to formulate effective summaries of information, provide prompts and cues for 50% of the ideas to be noted on the DVT.

I will increase student engagement by co-constructing DVTs *with* students for at least 50% of the ideas noted on the DVT.

On the checklist, I earn a score of 80% or above for teacher behaviors.

On the checklist, I earn a score of 80% or above for student behaviors.

While circulating during independent practice, I will provide feedback to at least 10 students.

While circulating during independent practice, I will score at least 8 students’ papers.
